Summary

Highly motivated **Java Backend Developer** experienced in designing scalable, high-performance systems using **Java, Spring Boot, Microservices, Redis, and Docker**. Proficient in building secure APIs with **Spring Security and JWT**, optimizing database interactions, and solving backend challenges including **N+1 query issues, pagination, and rate limiting**. Strong focus on clean architecture and system scalability.

Skills

Programming: Java, SQL

Backend Technologies: Spring Boot, Spring MVC, RESTful APIs, Microservices, Hibernate, JPA

Databases: MySQL, MongoDB, Redis

DevOps & Tools: Docker, Kubernetes, Git, GitHub, Maven, CI/CD Pipelines (Jenkins), Postman, Jira

Concepts: Data Structures, Database Optimization, Microservices Architecture, REST API Design, Caching Strategies, Pagination, Rate Limiting, JVM Internals, Multithreading, API Security (JWT)

Experience

Software Engineer

Jan 2024 – Present

Tudip Technologies, Pune

- Developed scalable backend services using **Java and Spring Boot**, enhancing system throughput by **30%**.
- Designed and implemented **RESTful APIs** capable of handling high-volume requests, reducing response time by **40%**.
- Implemented secure authentication and authorization using **Spring Security and JWT**.
- Resolved **N+1 query problem** using optimized queries and **JOIN FETCH**, reducing database calls significantly.
- Implemented **pagination and filtering** for large datasets to improve scalability and performance.
- Optimized database interactions using **Hibernate and JPA**.
- Worked on **microservices architecture** to build modular and scalable backend systems.
- Enhanced application responsiveness by **25%** through backend performance tuning.
- Implemented global exception handling and logging using **SLF4J**, improving system reliability.
- Applied **object-oriented programming (OOP)** principles to build scalable backend services in Java and demonstrated strong problem-solving skills by solving **500+ DSA problems** on LeetCode with a **consistent long-term streak**.

Projects

Aanchal Dairy Backend System | *Java, Spring Boot, Redis, Docker*

- Individually designed and developed backend services using **Spring Boot** and REST APIs for e-commerce operations.
- Designed and implemented **Redis caching strategy** to reduce database load and improve API response time.
- Secured APIs using **Spring Security and JWT authentication**.
- Implemented **rate limiting** to control API traffic and prevent system overload.
- Containerized application using **Docker** for consistent deployment across environments.
- Optimized database queries using **Hibernate and JPA**.

News Application Backend (Dubai Posts) | *Java, Spring Boot, Microservices, Kubernetes*

- Built backend using **microservices architecture** for scalability and modularity.
- Developed REST APIs for content management and admin workflows.
- Implemented **pagination** to efficiently handle large datasets.
- Deployed services using **Docker and Kubernetes** for orchestration and scaling.
- Implemented role-based access control using **Spring Security**.

Awards & Certifications

- Databricks Certified Data Engineer Professional

Education

Bachelor of Technology in Computer Science Engineering

Mahakal Institute of Technology, Ujjain

2019 – 2023

CGPA: 8.48
